FOR IMMEDIATE RELEASE

Airlink of South Africa goes live with eMRO

MIAMI, January 7, 2019 –

Johannesburg, South Africa based Airlink is a company that prides itself on its modernization strategy. Airlink recently completed its implementation of the TRAX eMRO cloud software solution. eMRO caters to every aspect of aircraft maintenance management. It is deployed via any web browser and allows users to stay connected from any work location. With true offline capability, eMRO automatically synchronizes when connected.

Airlink is a feeder network airline aimed at linking the smaller towns, regional centers and hubs throughout the country. It is in a strategic alliance with South African Airways and South African Express Airways and serves 38 destinations in 9 countries on the African continent. The fleet of 59 aircraft includes Embraer ERJs, Avro RJ85s, and Cessnas. Recently, Airlink became the first South African airline to acquire Embraer E-Jets (E-170s and E-190s).

Airlink will next move into Phase 2 of its modernization plans and employ the TRAX eMobility web-based and iOS apps. The combination of eMRO and eMobility software products will allow the Airlink team to be truly mobile in its maintenance operation. TRAX congratulates Airlink team on their accomplishment.
